## ME3A with digital temperature control £210.00

Intelligent digital controller. Simply set to your desired temperature and the unit will control to this - no more adjusting thermostats.

## ME4A with digital and full humidity control

£350.00

The full humidity control unit simply plugs into the machine and provides a vapour mist as and when required to maintain the set humidity level. Again you simply programme in the humidity required and the unit will control to this.
