R-Com
– the fun of
hatching chicks!

R-COM brings the marvel of watching eggs hatch in a neat, easy to use digital incubator

Designed in as an educational incubator the R-COM really works!

For learners, hobbyists, or teachers

Three hens eggs are gently warmed and turned automatically as they incubate and the display even counts down each day to tell you when they are due to hatch.

The R-Com is menu driven and extremely easy to use: just choose between one of the 5 settings (chicken, duck, pheasant, quail or mystery bird - to be programmed) and the micro-controller holds the correct temperature, turning and length of incubation. Turning will even stop automatically 2 days prior to hatching; all you need do is top up periodically with water.

Introductory Offer:

R-Com supplied with FREE small egg tray, large egg tray and battery candling lamp (worth £32.96) .
